become Malaysia's largest woven labels manufacturer. Placing customer satisfaction at the very core of its business;

we have put a great deal of emphasis on research and development to ensure continual improvement in its product quality and production efficiency.

To stay ahead of the curve in product development, the company consistently invest in newer weaving machines and technologies. It has now earned itself a reputation of being a one-stop labelling sourcing centre offering an extensive and complete range of highquality, value-added and cost-effective labels.

In 2003 Style Labels was awarded with ISO 9001: 2000 Quality Management Certificate for its commitment of providing quality assurance as accordance to international standards. Style Labels is also the first few company that has upgraded to the international standards of ISO 9001: 2015.

Why Ultifresh?

Singapore Brand

Ultifresh was founded in 2018. We have successfully expanded to China, Indonesia, Malaysia and Singapore with over 2,000 distributors supporting our brand.

Ultifresh Technology

A patented technology that kills 99.94% bacteria. The anti-bacterial and anti-odor features can be integrated into any fabric without affecting the outlook and hand feel of the apparel. Ultifresh technology is certified by SGS & Intertek.

Own Factory

Ultifresh possesses an efficient ordering system, established production facilities, strong manufacturing line and high quality control standards. Agents are able to check stock and order easily while receiving their goods on time.

Fabric Specialization (Microfiber Polyester Dri-Fit Material)

Apparels made of Microfiber Polyester help move the sweat quickly from the wearer's body to the surface of the fabric and hence keeping the wearer cool and dry.

Pad Printing

Pad Printing used for printing on otherwise difficult to print on products in many industries including medical, automotive, promotional, apparel, and electronic objects, as well as appliances, sports equipment & toys.

DTF Heat Transfer

Direct to film printing is a unique printing technology that involves printing designs onto special films for transfer onto garments. DTF printing is a heat transfer process that has the ability to last as long as traditional silkscreen prints.

UV Transfer

UV Transfer refers to a printing process that uses ultraviolet curing technology to make srickers, also known as crystal stickers. Just with fingers pressing, the patterns can be trans-fered from the PET film. The only thing you need to do is to divide the transfer film & the PET film. Then you peel out the transfer film, the photo appears on hard goods surface.

Sublimation Heat Transfer

Sublimation Heat Trasfer printing uses heat to essentially bring ink and fabric together as one. First, a design is printed onto special paper. The inks that are used turn into gas when brought under heat, then combine with the fabric and permanently print onto the fabric.

Silkscreen Printing

Silkscreen printing is a printing technique where a mesh is used to transfer ink (or dye) onto a substrate, except in areas made impermeable to the ink by a blocking stencil.

Roller Bottle Silkscreen

Roller Bottle, Glass Roller Bottle, Essential Oil Bottle, Drinking Bottle, Roller Thermos, Mugs & etc.
